Download **FREE** Berger's new colour app - **Berger Colour Scheme Pro Caribbean** & view more colour tools at www.bergerpaintscaribbean.com

Get the Best out of your Painting Project

Poor surface preparation is the source of most surface problems and can shorten the life of any paint job. Here are a few tips to add longer life to your paint job:

- Ensure a clean and dry surface, free from contaminants
- Remove mildew, grease, dirt, loose rust, peeling paint
- Read and follow application instructions
- Allow recommended drying times between coats
- Let new concrete cure at least 30 days
- Ensure wood is clean and dry before priming
- Prime new wood and seal resinous knots
- Fill nail holes and imperfections with appropriate filler
- Ventilate area for faster drying
